

VIDEO 2.1.3. SCIENTIFIC EXPLANATION OF TRUE HEALING + GREAT EXTRA

CHECK THE BOXES

- I have seen the entire video 2.1.3. Scientific Explanation of True Healing + Great Extra.
- I understand the latest research in neuroscience and epigenetics has discovered it is not our inherited genes which cause diseases, but it is our own 'reaction' to our physical and/or emotional environment, which switches on certain disease genes.
(In the response-ability section of this membership you will learn how to break the cycle of 'reacting' to your environment and become independent of your environment)
- I understand I have to heal fear, pain and diseases at the very root by repeating the daily fundamental cleansing experience to bring and keep my body into homeostasis or healthy balance: biochemically, physically, cellularly and even at the level of our genes.
- I understand repetition or turning my fundamental experience into a daily habit, rewires, cleanses and deprograms myself from hardwired victim-disease circuits run by my brain and body for decades.
- I understand the GREAT EXTRA that will become available for me when I turn my fundamental experience into a daily habit.
- I am ready for the next video.
